DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121: The inventions are distinct, each from the other because of the following reasons:

- I. Claims 1-12, drawn to image forming device, classified in class 399, subclass 39, 130.
- II. Claims 13-15, drawn to image forming device, classified in class 399, subclass 130.

2. Inventions II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation because, Invention II requires a plurality of photoconductors and exposure units and does not require a particular second developer image for color correction, as required by Invention I. Instead, Invention II requires that the controller execute a color correction.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Art Unit: 2859
